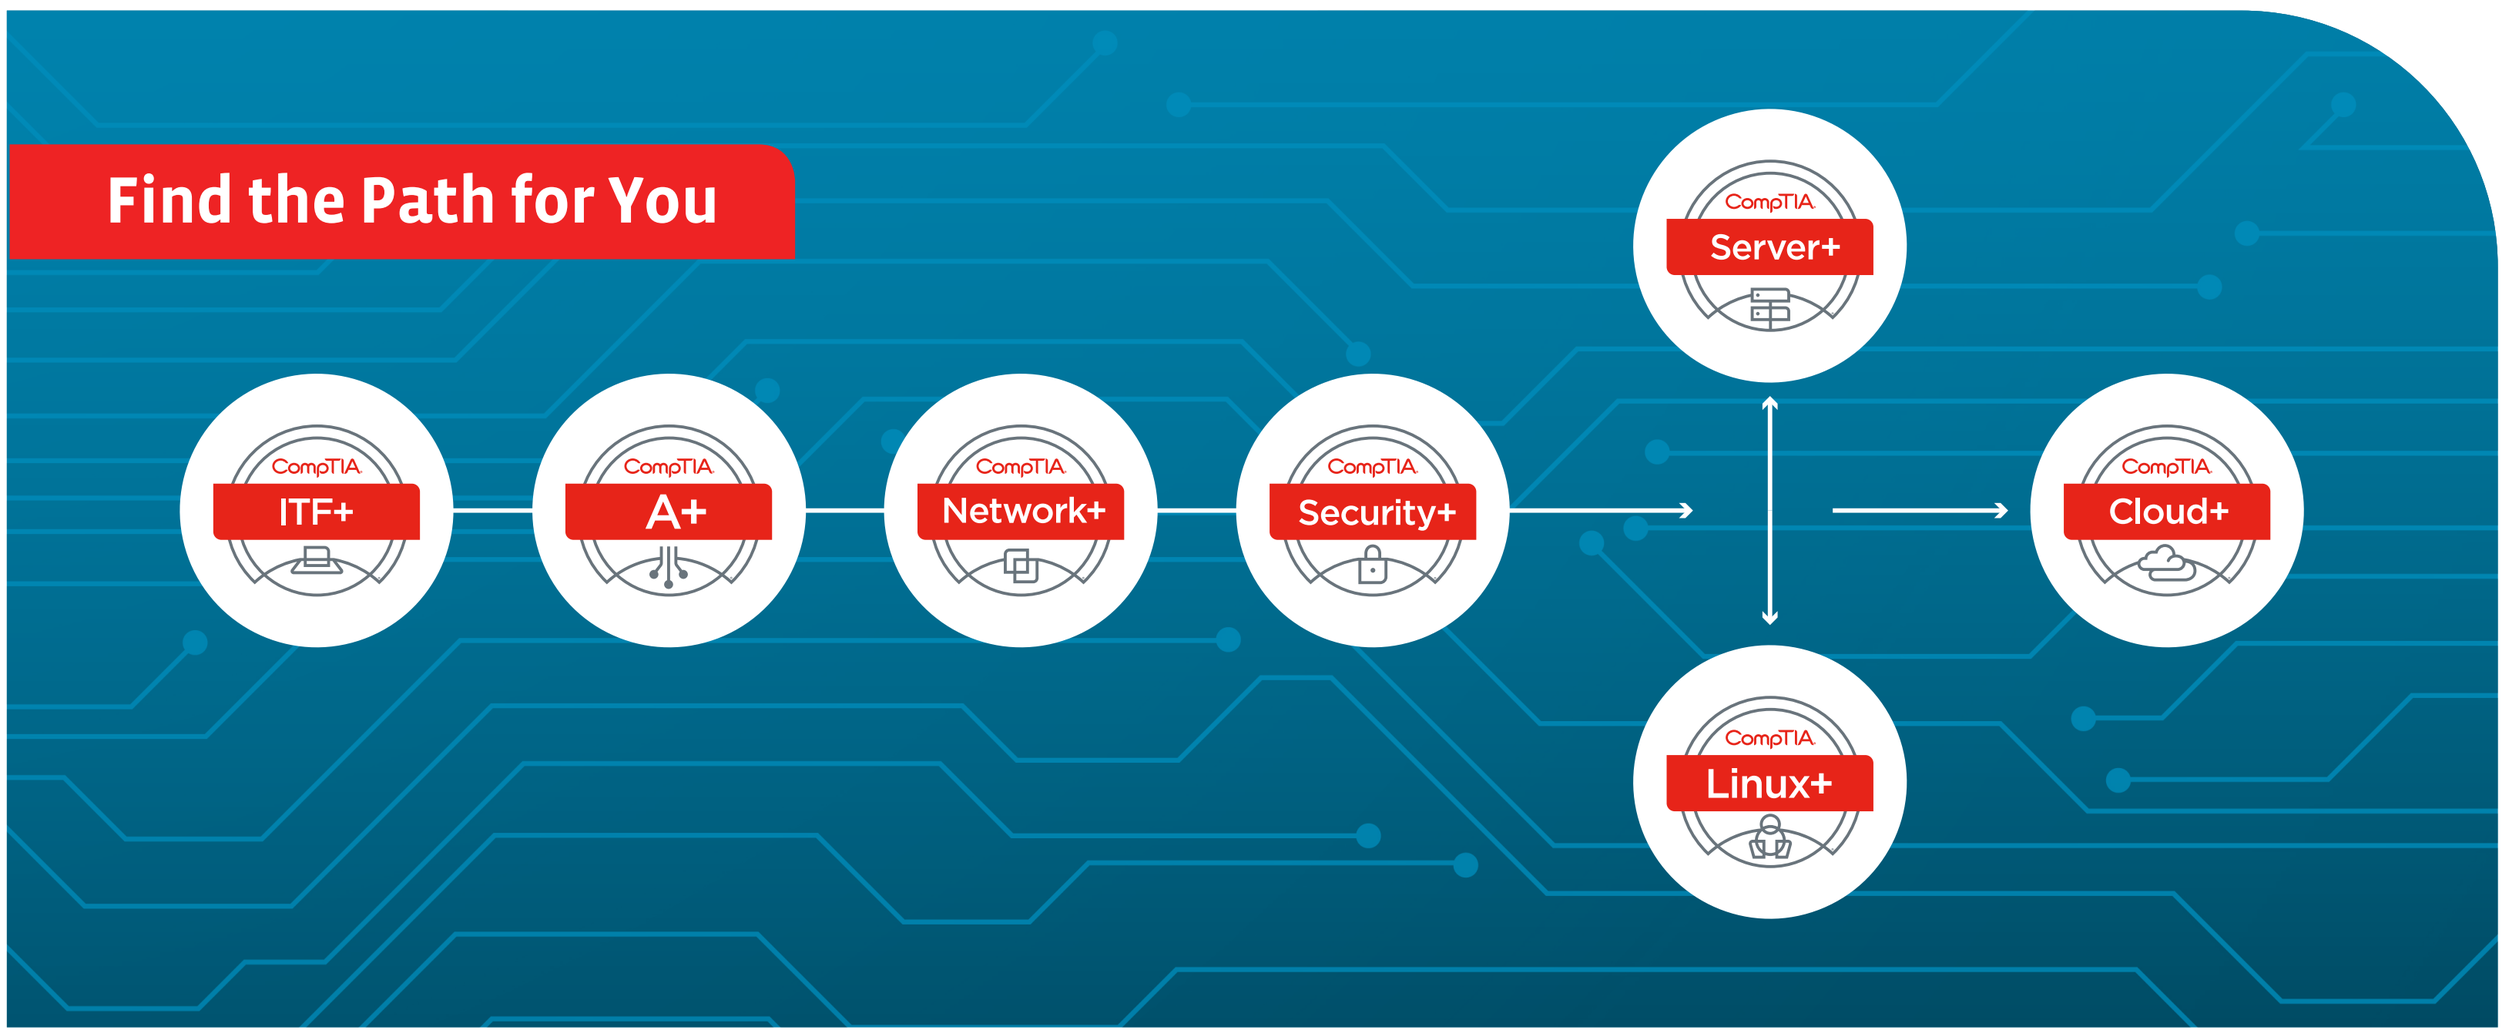
CompTIA Authorized Partner

The CompTIA Infrastructure Career Pathway



IT infrastructure is the bedrock of IT operations and necessary for any business to function. Employers use CompTIA certifications to identify IT pros who can support and manage data centre and network operations.

When taken in succession, the certifications in the CompTIA Infrastructure Career Pathway validates the skills needed across IT operations, deepening your mastery and broadening the number of IT infrastructure roles you can fulfill including:

- System Administrator
- Network Administrator
- System Engineer

There is a 12% job growth expected for Network & Computer Systems Administrators, 2012 – 2022, according to the BLS.
