WHY ARE OFFICIAL COMPTIA LEARNING RESOURCES DIFFERENT?

- **For Exam Takers by the Exam Developer** - Official CompTIA learning resources are the only study material exclusively developed by CompTIA for the CompTIA certification candidate.
- **Designed for Instructors by Instructors** - Developed on the principle that “people learn best from other people,” the Official CompTIA A+ Guides are specifically designed for expert-facilitated delivery. More than 200 instructors were involved in the development of A+ Official learning resources providing feedback through focus groups, reviews and surveys.
- **Complete Library** - No other content library covers all exam objectives for all certifications. It provides complete breadth, depth and currency of material unavailable with competitors.

KEY FEATURES AND BENEFITS

- **Robust Assessment** - Practice questions for each lesson and a final assessment covering all lessons, more than 300 questions in total, are available to help students practice and demonstrate what they have learned. Additionally, performance-based questions help students apply knowledge in actual scenarios.
- **Integrate Active Learning** - Each topic has at least one activity enabling students to practice guidelines and procedures, as well as solidify understanding of the informational material presented in the course. Activities present a job-plausible scenario or job-realistic assignment and then provide step-by-step instructions for how to approach the problem at hand. Activities may also require the student to analyze sample data, engage in structured discussion or analyze case studies.
- **Alignment and Consistency Across Book, Labs and Assessment** - The book, labs and assessment work together with a similar approach and voice ensuring that instructors and students have a cohesive, “single-sourced” solution for their A+ courses. Activities within the book inform the classroom labs and the virtual labs designed for the course. Assessments are based on lessons in the book and includes a final cumulative assessment.
- **Engaging Video Program Developed Exclusively for CompTIA** - Videos developed exclusively for CompTIA provide short, engaging demonstrations of key activities in the course. The videos provide an alternative to hands-on demonstrations for virtual environments or for classrooms that do not have access to all equipment mentioned in the course.

LABS

CompTIA Labs, hosted by Skillable, allow students to learn in actual software applications through a remote lab environment. Labs allow students to practice what they are learning using real, hands-on experiences. Students have access to the software environment for 12 months after a CompTIA Labs access key is redeemed, providing a post-class resource for students to practice their skills.
