

CompTIA Cloud+ CV0-003 to CV0-004

# Learning Products Comparison Guide

Cloud+ CV0-004 learning products introduce candidates to the information and essential skills necessary to implement, maintain, optimize and troubleshoot cloud-based infrastructure services. The updated course structure and learning design model are designed to provide greater consistency in the learning experience and improve information retention and skills development.

**CertMaster Perform** delivers a comprehensive, self-paced eLearning experience that includes instructional content, videos, skills assessments and labs. Instruction is centered around a learning progression model to help students learn concepts and actively build skills related to the course objectives. The revised course structure organizes the learning experience into modules and lessons. Lessons contain learning content aligned to topics required to master specific skills. Modules consist of multiple lessons aligned to higher-level learning objectives and feature at least one performance-based activity.

Consistent with CompTIA's vision for learning products, Cloud+ CV0-004 offers a quality learning experience informed by industry and subject matter experts and defined by a focus on the acquisition of skills aligned to specific job-role competencies. The product is also designed to promote demonstratable evidence of learning via simulations, virtual-environment labs, formative assessments, and summative assessments.

This guide will help you understand the differences in the learning products available with Cloud+ CV0-004 as compared to Cloud+ CV0-003.

# CertMaster Courseware

CertMaster courseware delivers a robust eLearning experience that helps learners gain the knowledge and practical skills necessary to be successful on CompTIA certification exams and in their IT careers.

## CertMaster Learn Cloud+ CV0-003

Includes:

- ✓ Narrative instructional content
- ✓ Videos and animations
- ✓ Performance-based questions
- ✓ Practice tests
- ✓ Review activities
- ✓ Quizzes and assessments

- A Learning Plan helps learners stay on track with their studies while robust analytics bring awareness of strengths and weaknesses

## Integrated CertMaster Learn + Labs Cloud+ CV0-003

Includes everything in CertMaster Learn Cloud+ CV0-003, plus:

- ✓ Live labs in cloud environments
- Labs are integrated as Study Tasks within the CertMaster Learn Learning Plan

## CertMaster Perform Cloud+ CV0-004

Includes:

- ✓ Narrative instructional content
- ✓ Videos and animations
- ✓ Live labs in cloud environments
- ✓ Practice tests
- ✓ Lesson reviews
- ✓ Quizzes and assessments

**New!**

- Instruction is centered around a **learning progression model** to help students learn concepts and actively build skills related to the course objectives
- The course is broken into **modules and lessons**, and different activities throughout the course provide hands-on skills practice and personalized instruction
- Where applicable, the **Network Modeler** is a new simulation tool that provides learners with practical experience in understanding, designing, testing and resolving networking issues

# CertMaster Labs

CertMaster Labs enables hands-on practice and skills development through a remote, browser-based lab environment. Aligned with CompTIA Cloud+ exam objectives, CertMaster Labs makes it easy for learners to practice and apply their skills in real workplace scenarios in preparation for the certification exam. All lab activities include gradable assessments, offer feedback and hints, and provide a score based on learner inputs, ultimately guiding students to the most correct and efficient path through job tasks.

## CertMaster Labs Cloud+ CV0-003

Includes:

- ✓ Applied Labs
- ✓ Assisted Labs
- All labs are live labs completed in a virtual machine environment with a fully functional range of virtual machines, networks, and cloud accounts
- Assisted Labs guide the learner step-by-step through tasks, offering assessment and feedback and allowing the learner to make corrections as they proceed through the activity
- Applied Labs present a series of goal-oriented scenarios, scoring the student at the end of the activity based on their ability to successfully complete each scenario

## CertMaster Labs Cloud+ CV0-004

Includes:

- ✓ Labs (network modeler simulations)
- ✓ Live Labs
- ✓ Applied Live Labs
- **New!** Where applicable, labs use the Network Modeler to provide a visual topology for students to observe, configure, and design networks
- Live Labs are used for intermediate and advanced job tasks and scenarios
- Applied Live Labs present a series of goal-oriented scenarios in a virtual machine environment, scoring students at the end of the activity based on their ability to successfully complete each scenario

# Additional Learning Resources

## CertMaster Practice

The content in CertMaster Practice has been updated to map to the Cloud+ CV0-004 exam objectives. Product features have largely remained the same from Cloud+ CV0-003.

CertMaster Practice is an online knowledge assessment and training companion tool to help learners prepare for the specific certification exam. Featuring an adaptive question-first design, CertMaster Practice quickly assesses what learners already know and what they still need to learn. For those topics where a learner needs more support, CertMaster Practice provides personalized remediation and feedback. Once learners are ready, they can demonstrate their knowledge on a timed practice test complete with performance-based questions.

## Self-Paced Study Guide and Instructor/Student Guide

Because the CertMaster Perform courseware provides a much more robust, interactive learning experience, the Self-Paced Study Guide and Instructor/Student Guides have been discontinued for Cloud+ CV0-004.
