

## Retrain and Remain Compliant: CompTIA Certifications Approved for DoDM 8140.03

Released in February 2023, DoDM 8140.03 prescribes standards and assigns responsibilities for the management of the DoD cyber workforce to include workforce identification, tracking, qualification, and reporting.

The DoDM 8140.03 qualification standards focus on a demonstration of capability rather than a compliance-based approach, as was DoDM 8570.01, ensuring that the cyber workforce is competent in performing the required functions of their job role.

In addition, organizations can feel empowered to maintain their own unique requirements based on operational needs.

DoDM 8140.03 Goals:

- Provide a larger array of standards-based certification and training options based on 72 job roles that the DoDM 8140.03 currently defines.
- Allow DoD workers to choose between certification and training options. Learners can choose certification for well-defined job roles or assessment-based training for emerging technologies.
- Attract, upskill, and retain a more inclusive, diverse workforce and track their progress.

By February 2025, all DoD civilian employees and military service members in DCWF work roles under the cybersecurity workforce element must be qualified in accordance with DoDM 8140.03.

### Why CompTIA

Seven CompTIA certifications have been approved for the U.S. Department of Defense Directive 8140.03-M: CompTIA A+, CompTIA Network+, CompTIA Security+, CompTIA Cloud+, CompTIA PenTest+, CompTIA Cybersecurity Analyst (CySA+) and CompTIA Advanced Security Practitioner (CASP+). Covering 31 different work roles, our certifications are vendor-neutral, internationally recognized credentials and are accredited by ANSI to comply with the ISO 17024 standard.

In recent research, employers say they are more than willing to pay for employee certification\*:

- 59% of organizations say they plan to invest more in staff reskilling
- 55% of organizations paid for certification exam fees
- 53% say they will pay for certification exam preparation fees

For the IT professional the benefits of certification are also clear\*:

- 81% of candidates produce higher quality of work
- 77% are better able to innovate after earning certifications
- 72% are more productive
- 72% are more efficient
